

RETRACTABLE TUBES

Advanced technology and superior elasticity. Excellent resistance to punctures and tears.

 Great Elastic Capacity

 UV Stabilized

 Superior Resistance

 Weather Protection

All Dimensions :

4' x 150' x 4MIL / 76" x 150' x 4MIL
(1.22m x 45.70m x 4MIL / 1.93m x 45.70m x 4MIL)

4' x 220' x 4MIL / 76" x 220' x 4MIL
(1.22m x 67.05m x 4MIL / 1.93m x 67.05m x 4MIL)

5' x 150' x 4MIL / 87" x 150' x 4MIL
(1.52m x 45.70m x 4MIL / 2.21m x 45.70m x 4MIL)

5' x 220' x 4MIL / 87" x 220' x 4MIL
(1.52m x 67.05m x 4MIL / 2.21m x 67.05m x 4MIL)

Ideal For Round And Square Bales

A technology that allows you to keep your chopped silage without having to build or spend huge sums for silos. Our silage tubes have a higher elasticity, which allows them to be more resistant to punctures and tears caused by animals or farm machinery. Has a memory allowing it to adjust to the silo to eliminate oxygen and provide an ideal environment for fermentation. Our 150 ft tube fit approximately 35 bales and our 220 ft tube fit approximately 50 bales. Our retractable tubes are the fastest, most economical, most convenient and most reliable way to produce baled silage. The system provides a practical way to improve the palatability of soft-textured baled silage. Built to withstand the harsh North American climate and guaranteed for 12 months against manufacturing defects.

COLOR : WHITE ON BLACK
