## With the Farmer in Mind

Plastitech offers high quality silage wrap. Our formulations and resins are suitable for multiple uses. We use our canvases across North America to cover pits/bunkers and for silage concealment. Increased resistance to perforation and tearing, our silage wrap ensure excellent efficiency and are the ideal tool. Made in Europe, our silage wrap offer excellent watertightness and conservation properties.

## A Product Made for You

Very strong films made of Metallocene, the strongest type of polyethylene. They offer outstanding protection from UV and mechanical damages, thus guaranteeing the integrity and airtightness of the silo. Also, they are easier to install than standard silage films.

**COLOR : BLACK and BLACK/WHITE**
